Feature List

Project Name: nopCommerce Demo Site Testing
Project URL: https://demo.nopcommerce.com
Prepared by: Anza A.N

Introduction

nopCommerce is an open-source eCommerce platform that provides a fully functional demo site to showcase how an online store operates. The demo allows users to explore both the customer interface and admin panel, demonstrating features like product browsing, shopping cart, secure checkout, order management, and customer accounts. It serves as a practical example for understanding real-time eCommerce functionality and system management.
